SETTING NEW STANDARDS IN WIRE MESH AND SCREENING MEDIA

# AUGHEY SCREENS

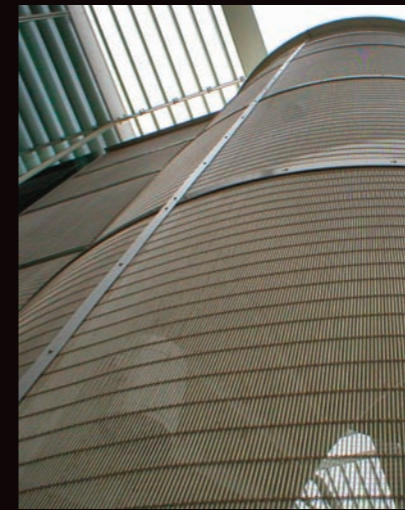

Aughey Screens brings you the resources and expertise of more than 30 years of specialist knowledge and understanding of wire mesh and screening media that's unique and unrivalled.

Wherever you look you will find examples of Aughey products in action, helping people in industries throughout the world. For instance, we manufacture screening for material grading in quarries, mines and recycling plants. We help architects achieve stunning new effects with a variety of Mesh products in different materials. And for a huge spread of other industries we manufacture and supply products of exceptional diversity – from greenhouse staging for nurseries to steel mesh and bar for concrete reinforcement. Whatever your requirements, we would be please to talk to you about how we can help.

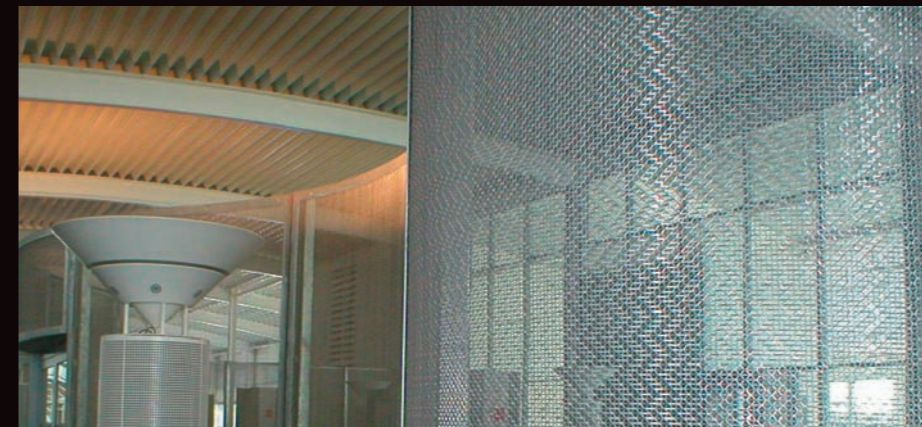

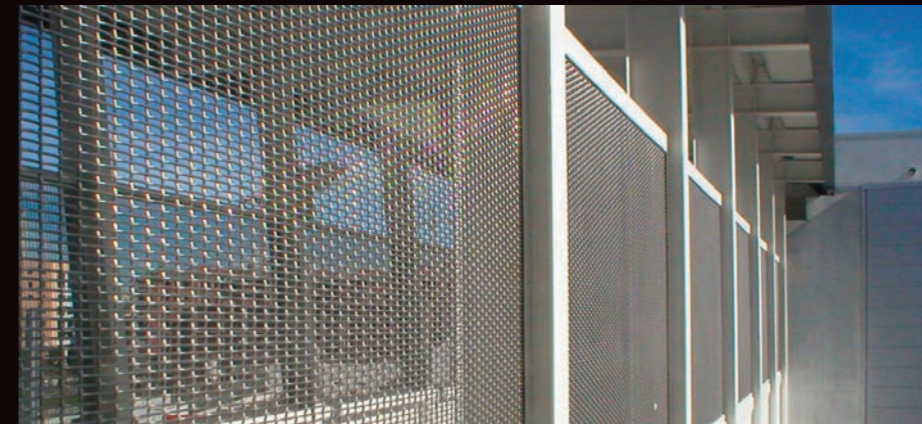

Our raw material is sourced from around the world, thus we can constantly ensure the quality of our material meets our high standard while providing highly competitive products.

So whether we are supplying woven wire mesh to the quarry sector, finger decks to a recycling plant or a stainless steel façade for a stadium, we can insure that the quality of our product will meet your expectations.

In recent years Aughey Screens have used their extensive experience in the manufacture of woven wire mesh to develop a range of architectural mesh suitable for both indoor and outdoor use.

From our manufacturing plant in Monaghan Aughey Screens can provide a wide range of mesh combinations in different types of metal, (stainless steel and galvanised are the most preferred). These mesh products offer a long lasting durable finish with a range of appearance options too;- Ceilings, balustrades, wall facades, staircase cladding, lift enclosures and sun screens.

Wire mesh facades offer an ideal solution for both internal and external requirements.

The difference combination of wire diameters and mesh patterns result in each application having its own unique appearance. When these products are combined with suitable lighting the results are very impressive. There are a number of different fitting options, one of which is detailed in this picture. There are many other options for fixing these facades which can be customised based on the application. Contact our sales office for more information.
